August 9, 2013

Dear Camden-Wyoming Sewer & Water Authority Customer:

We are in the process of completing the Water Tower Maintenance on S West Street. This process includes refilling the tank. This process will take about 2 days and began Thursday, August 8<sup>th</sup>. After a few customers began calling the main office on Thursday, August 8<sup>th</sup> we have determined that this process has disturbed the system.

During the process of refilling the Water Tower, it was not our intention to disturb the rest of our system unfortunately this did happen and we do apologize. You may have experienced discolored water Thursday, August 8<sup>th</sup> and this may happen again today for we are still in the process of filling the Water Tower. If you do experience discolored water, please contact the office so that we can log it. We will not be filling the tank over the weekend.

Before the S. West Street Water Tower is put back in service a Bacteriological Test will be performed by the Office of Drinking Water. Once the Water Tower on S. West Street is approved by the Office of Drinking Water the Water Tower will be put back in service.

The Water Tower maintenance began in mid-June and has taken longer than expected due to the amount of rain days we have had over the past month and a half. Again, we do apologize for any inconvenience that this process may have caused. We are expecting the Water Tower to be in full service in about a week.

Again we do apologize for any inconvenience during this process and feel free to call us if you have any questions.

Respectfully,

*Camden-Wyoming Sewer & Water Authority*
